5-minute window

10 min

sustained breach

minimum 20 requests

Verified acceptance

END-TO-END VERIFIED

A complete path from bounded test traffic to confirmed recovery.

VERIFICATION STATUS

Deployed evidence confirms the alert lifecycle, exemplar, matching Jaeger spans, exact CloudWatch IDs and healthy recovery.

VERIFIED CAPTURE SEQUENCE

VERIFIED CONTROLLED BEHAVIOR

ERROR MODE

Deliberate HTTP 500

Selected /test mode confirmed as root cause; stopping controlled traffic restored service.

LATENCY MODE

Fixed 400 ms success

Validated separately from error mode without suppressing or bypassing the alert.

EVIDENCE CHAIN

ACCEPTANCE BOUNDARY

PROVEN IN REPOSITORY

HTTP server/client tracing; RED metrics and exemplars; Jaeger/Grafana provisioning; both 10-minute alerts; temporary phase routes removed.

Durable demo surface POST /test remains documented.

VERIFIED IN DEPLOYMENT

Healthy Jaeger; populated panels; full alert lifecycle; trace links; exact CloudWatch correlation; versions; recovery and ordinary traces.

Limits Non-durable Jaeger; 100% lab sampling; DB N/A.
